THE JOURNAL OF BIOCHEMISTRY

EDITED FOR

THE JAPANESE BIOCHEMICAL SOCIETY

VOLUME 76, 1974

EDITORIAL BOARD

Editor-in-Chief; Haruhisa YOSHIKAWA

Editors

Setsuro EBASHI, Yasutomi NISHIZUKA, Kazutomo IMAHORI, Shosaku NUMA, Shin-ichi ISHII, Ryo SATO, Yoshito KAZIRO, Ikuo YAMASHINA

Managing Editors

Goro KIKUCHI, Yoshiaki MIURA

Regular Reviewers

Yasuhiro ANRAKU, Takahiko HOSHITA, Akira ISHIHAMA, Yasuo KAGAWA, Yoshimasa KYOGOKU, Takashi MURACHI, Yoshitsugu NOSE, Takamitsu SEKINE, Yasuyuki TAKAGI, Gakuzo TAMURA, Koichi YAGI, Toshio YAMANO, Kozo HAMAGUCHI, Akira ICHIHARA, Koichi IWAI, Masayasu KITAGAWA, Shigeki MINAKAMI, Kei NAGANO, Tsuneo OMURA, Kazuo SHIBATA, Kenji TAKAHASHI, Shigeru TSUIKI, Yasuo YAGI, Zensaku YOSHIZAWA, Tadao HORIUCHI, Tokuji IKENAKA, Sadaaki IWANAGA, Jiro KOYAMA, Yasuji MINODA, Shoshichi NOJIMA, Toshiaki OSAWA, Masamiti TATIBANA, Shosuke TAKEMURA, Daisuke TSURU, Tamio YAMAKAWA, Yasumi YUGARI

CONTENTS OF VOLUME 76

No. 1, July, 1974

PAGE

Structure and Function of D-Amino Acid Oxidase. VIII. Circular Dichroism Study in the Ultraviolet Region. *H. Ōhama, N. Sugiura, and K. Yagi* 1

The Role of a Tyrosine Residue of Bacterial Liquefying α-Amylase in the Enzymatic Hydrolysis of Linear Substrates as Studied by Chemical Modification with Acetic Anhydride. *M. Ohnishi, T. Suganuma, and K. Hiromi* 7

Structure and Immunological Properties of D-Arabino-D-galactans Isolated from Cell Walls of *Mycobacterium* Species. *A. Misaki, N. Seto, and I. Azuma* 15

Phosphorylation of Endogenous Hepatic Proteins by Adenosine 3′, 5′-Monophosphate-dependent Protein Kinase. *S. Matsumura and Y. Nishizuka* 29

An Improved Chromatographic Method for the Analysis of Iodoamino Acids in Thyroglobulin. *K. Sorimachi and N. Ui* 39

A Myosin-like Protein in the Cortical Layer of Cleaving Starfish Eggs. *I. Mabuchi* 47

Kinetic Studies on the Hydrolyses of α-, β-, and γ-Cyclodextrins by Taka-amylase A. *N. Suetsugu, S. Koyama, K. Takeo, and T. Kuge* 57

Cell-surface Changes of Phosphate-deficient *Escherichia coli* as Characterized by Increased Stability and Decreased Concanavalin A-Agglutinability of the Spheroplast. *M. Arisawa and H.B. Maruyama* 65

Studies on Ribosomal Ribonucleic Acid from Yeast. II. Specific Complex of Yeast Ribosomal RNA. *K. Yanagi and K. Iso* 73

Phosphodiesterase-phosphomonoesterases from *Fusarium moniliforme*. V. Mode of Action on Various Nucleotides. *Y. Hamagishi and H. Yoshida* 81

2, 3-Diphosphoglycerate and Phosphoglycerate Mutase Levels in Animal Tissues and Erythrocytes. *H. Chiba, K. Ikura, R. Sasaki, E. Sugimoto, and H. Saimyoji* 91

Studies on Mitochondrial and Microsomal Nucleoside Diphosphatases of Rat Liver. *T. Shirasaka, T. Arima, and S. Fujii* 99

Polynucleotides. XXI. Synthesis and Properties of Poly 1-Deazaadenylic Acid and Poly 3-Deazaadenylic Acid. *M. Ikehara, T. Fukui, and S. Uesugi* 107

Fractionation of Two Diguanylic Acids with Different Internucleotide Linkages and Its Application for Analyses of the Synthetic Products of Ribonuclease T_1 and Spontaneous Reaction. *A. Omori, H. Yoshida, and N. Tamiya* 117

Differentiation of Myosin in Chick Embryos. *T. Masaki and C. Yoshizaki* 123

Isolation of a Novel Menaquinone with a Partly Hydrogenated Side Chain from *Propionibacterium arabinosum*. *N. Sone* 133

The Redox Reactions in Propionic Acid Fermentation. IV. Participation of Menaquinone in the Electron Transfer System in *Propionibacterium arabinosum*. *N. Sone* 137

Studies on Trypsin Inhibitors in Sweet Potato. II. Modification of Amino Acid Residues in Inhibitor III. *T. Ogiso, S. Tamura, Y. Kato, and M. Sugiura* 147

Control of δ-Aminolevulinate Synthetase Activity in *Rhodopseudomonas spheroides*. III. Partial Purification of the Fraction I Activating Enzyme and the Occurrence of Two Forms of Fraction II. *S. Hayasaka and S. Tuboi* 157

PAGE

Structure and Function of Chloroplast Proteins. XXII. Dissociation and Reconstitution of Spinach Leaf Ribulose-1, 5-diphosphate Carboxylase. *M. Nishimura and T. Akazawa* 169

Factors Affecting the Interactions of Collagen Molecules as Observed by *in Vitro* Fibril Formation. III. Non-helical Regions of the Collagen Molecules. *T. Hayashi and Y. Nagai* 177

Methionine Transfer RNA from Insect Tissue. *M. Kawakami, T. Kakutani, and S. Ishizuka* 187

Immobilized Enzymes. I. Immobilization of Carboxypeptidase C_N, a Preparation from *Citrus natsudaidai* HAYATA. *H. Ueki, S. Nagai, S. Shoji, T. Funakoshi, and Y. Kubota* 191

SHORT COMMUNICATIONS

Nucleotides Bound to Brain Tubulin and Reconstituted Microtubules. *T. Kobayashi* 201

Absence of the Minor RNA Components in Fetal Rat Liver Polysomes. *T. Inoue, Y. Umemura, and H. Yamaguchi* 205

Use of Fourier Transform ^{13}C Nuclear Magnetic Resonance Spectroscopy for Sulfate Placement in Chondroitin Sulfates. *S. Honda, H. Yuki, and K. Takiura* 209

Disruption of Charge Separation Followed by that of the Proton Gradient in the Mitochondrial Membrane by CCCP. *S. Hirose, N. Yaginuma, and Y. Inada* 213

Electron Spin Resonance Study of the Interaction between Heavy Meromyosin and Mn^{2+}. *M. Yazawa and F. Morita* 217

PRELIMINARY NOTES

Absence of Seminolipid in Seminoma Tissue with Concomitant Increase of Sphingoglycolipids. *I. Ishizuka and T. Yamakawa* 221

Kidney and Serum β-N-Acetylglucosaminidase Activities in Streptozotocin Diabetic Rats and Their Responses to Insulin and Glucagon. *H. Fushimi and S. Tarui* 225

Requirement for Thiamine Pyrophosphate and Magnesium for Sulfoacetaldehyde Sulfo-Lyase Activity. *H. Kondo and M. Ishimoto* 229

Energization of NTP-NDP Kinase by Acid-base Transition Leading to ATP Formation. *T. Oku, K. Hosoi, G. Soe, T. Kakuno, and T. Horio* 233

A Low Sulfated Keratan Sulfate-like Substance in Rabbit Femur. *M. Masubuchi and Z. Yosizawa* 237

No. 2, August, 1974

Studies on Energy and Electron Transfer Systems in the Green Photosynthetic Bacterium *Chloropseudomonas ethylica* Strain 2-K. II. Composition of Pigments and Electron Transfer Systems. *Y. Shioi, K. Takamiya, and M. Nishimura* 241

Transport of Sugars and Amino Acids in Bacteria. X. Sources of Energy and Energy Coupling Reactions of the Active Transport Systems for Isoleucine and Proline in *E. coli*. *H. Kobayashi, E. Kin, and Y. Anraku* 251

DNA Dependent RNA Polymerase from Ehrlich Ascites Tumor Cells. IV. A Novel Protein Repressing RNA Polymerase II. *S. Natori, K. Takeuchi, and D. Mizuno* 263

The Inhibition Mechanism of the Cytochrome Oxidase Reaction. V. Quantitative Analyses of the Formation of the Kinetically Inactive Complex of Cytochrome Oxidase with Cyanide. *S. Yoshikawa and Y. Orii* 271

Studies on the Polypeptide Elongation Factors from *E. coli*. IV. Crystalline Tu·GTP, Tu·Gpp(CH_2)p, and Phenylalanyl-tRNA·Tu·GTP Complex. *K. Arai, M. Kawakita, and Y. Kaziro* 283

PAGE

Studies on the Polypeptide Elongation Factors from *E. coli*. V. Properties of Various Complexes Containing EF-Tu and EF-Ts. *K. Arai, M. Kawakita, and Y. Kaziro* 293

Endo-β-N-acetylglucosaminidases Acting on the Carbohydrate Moieties of Glycoproteins. The Differential Specificities of the Enzymes from *Streptomyces griseus* and *Diplococcus pneumoniae*. *M. Arakawa and T. Muramatsu* 307

The Isolation and Characterization of Glycopeptides from Plasma Membranes of an Ascites Hepatoma, AH 66. *I. Funakoshi, H. Nakada, and I. Yamashina* 319

Adenylate Kinase Activity. In Ciliary Axonemes Isolated from *Tetrahymena pyriformis*. *M. Otokawa* 335

Hydrophobic Force as a Main Factor Contributing to Plastein Chain Assembly. *K. Aso, M. Yamashita, S. Arai, and M. Fujimaki* 341

Immune Responses to Chemically Modified Bacterial α-Amylase. *S. Nakashima, K. Sugimura, T. Sawada, and M. Mazaki* 349

Studies on Triglyceride Synthesis in Lipid Micelles from Adipose Tissue. *N. Matsuoka, Y. Saito, H. Okuda, and S. Fujii* 359

Studies of Enzymatically Active Subfragments of Myosin-Adenosinetriphosphatase. III. Separation of Two Components. *K. Yagi and F. Otani* 365

Carboxypeptidase C_N. II. Stability and Some Chemical and Kinetic Properties. *Y. Kubota, S. Shoji, T. Funakoshi, and H. Ueki* 375

A Quantitative Approach to the Evaluation of 2-Acetamide Substituent Effects on the Hydrolysis by Taka-N-acetyl-β-D-glucosaminidase. Role of the Substrate 2-Acetamide Group in the N-Acyl Specificity of the Enzyme. *K. Yamamoto* 385

Relationship between Ion Exchange-type Cation Binding and ATP-dependent Calcium Uptake in Brain Microsomes. *D. Satomi* 391

A Sulfate-dependent Acid Phosphatase of *Thiobacillus thiooxidans*. Its Partial Purification and Some Properties. *N. Tominaga and T. Mori* 397

The Role of Direct Phosphorylation in the Mechanism of Adenosine Utilization for Nucleotide Synthesis in Mouse Erythrocytes. *H. Miyazaki, K. Nambu, Y. Minaki, M. Hashimoto, and K. Nakamura* 409

Inhibition of Protein Kinase and Cyclic AMP Phosphodiesterase by Eritadenine Isoamyl Ester. A Possible Mechanism for Its Biphasic Effects on Cyclic AMP-dependent Lipolysis, Steroidogenesis and Amino Acid Uptake. *H. Iwai* 419

Turnover Rates of Structural Proteins of Rabbit Skeletal Muscle. *T. Koizumi* 431

Immunochemical Comparison of Myosins from Chicken Cardiac, Fast White, Slow Red, and Smooth Muscle. *T. Masaki* 441

Additional Evidence for the Liberation of Substrate α-Hydrogen Prior to Reduction of the Coenzyme in D-Amino Acid Oxidase Reaction. *K. Yagi, M. Nishikimi, A. Takai, and N. Ohishi* 451

SHORT COMMUNICATION

Inhibition of Bovine Liver Rhodanese by α-Ketoglutarate. *S. Oi* 455

No. 3, September, 1974

Isolation and Characterization of Glycopeptides from Rat Liver Mitochondria. *N. Itoh, T. Kawasaki, and I. Yamashina* 459

PAGE

The Structure and Function of Acid Proteases. III. Isolation and Characterization of the Active-site Peptides from Bovine Rennin. *W.-J. Chang and K. Takahashi* 467

The Number of Subsites in the Active Site of Saccharifying α-Amylase from *Bacillus subtilis.* *T. Shibaoka, K. Miyano, and T. Watanabe* 475

Dissociation of Bovine Liver Catalase into Subunits on Acetylation. *H. Furuta, A. Hachimori, Y. Ohta, and T. Samejima* 481

Studies on Silk Fibroin of *Bombyx mori* Directly Extracted from the Silk Gland. III. N-Terminal Analysis and Degradation in a Slightly Alkaline Solution. *T. Sasaki and H. Noda* 493

Gel Chromatography and Gel Electrophoresis of Histones in Denaturing Solvents. Limited Dependence on Molecular Weight. *K. Hamana and K. Iwai* 503

Amino Acid Transport in Spores of *Aspergillus oryzae.* *H. Sinohara* 513

Studies on the Polypeptide Elongation Factors from *E. coli.* VI. Characterization of Sulfhydryl Groups in EF-Tu and EF-Ts. *K. Arai, M. Kawakita, S. Nakamura, I. Ishikawa, and Y. Kaziro* 523

NMR Spectra of Peracetylated Methyl D-Hexopyranosides and Their 2-Acetamido-2-deoxy Derivatives in the Presence of an Europium Shift Reagent. *K. Izumi* 535

Structures of Two Sulfated Unsaturated Disaccharides Isolated from Enzymatic Digests of ω-Heparin (Whale Heparin). *N. Ototani and Z. Yosizawa* 545

Osmotic Stabilization of Unsaturated Fatty Acid Auxotrophs of *Escherichia coli.* *Y. Akamatsu* 553

Studies on Cellulase Produced by the Phytopathogens. Purification and Enzymatic Properties of Cellulase of *Fusarium moniliforme.* *K. Matsumoto, Y. Endo, N. Tamiya, M. Kano, K. Miyauchi, and J. Abe* 563

Sulfated Heteropolysaccharide-peptide Complexes from Oyster Viscera. *A. Ogamo, H. Watanabe, and K. Nagasawa* 573

Biochemical and Topographical Studies on the Cell Surface of *Escherichia coli.* I. Isolation and Characterization of Detergent-sensitive Mutants. *M. Ono-Onitsuka and H.B. Maruyama* 583

Cellular Senescence in Yeast Caused by Carbon-source Starvation. II. Induction and Subcellular Location of Lipid Peroxidation Activity. *T. Miura and R. Sato* 593

Properties of Some Heart Sarcolemmal-bound Enzymes. *D.B. McNamara, J.N. Singh, and N.S. Dhalla* 603

Partial Purification and Some Properties of Pyruvate-aspartic Semialdehyde Condensing Enzyme from Sporulating *Bacillus subtilis.* *F. Yamakura, Y. Ikeda, K. Kimura, and T. Sasakawa* 611

Kinetic Studies on the Inhibition of Nucleoside Diphosphate Kinase by Desdanine. *T. Saeki, M. Hori, and H. Umezawa* 623

Pyruvate Kinase of *Escherichia coli.* Its Role in Supplying Nucleoside Triphosphates in Cells under Anaerobic Conditions. *T. Saeki, M. Hori, and H. Umezawa* 631

Studies on Cathepsins of Rat Liver Lysosomes. I. Purification and Multiple Forms. *K. Matsuda and E. Misaka* 639

SHORT COMMUNICATIONS

Role of Tubulin —SH Groups in Polymerization to Microtubules. Functional —SH Groups in Tubulin for Polymerization. *R. Kuriyama and H. Sakai* 651

Isolation and Crystallization of Valyl-tRNA Synthetase from *E. coli* MRE 600. *H.H. Paradies* 655

PRELIMINARY NOTES

KCl-jump Induced Formation of Adenosine Triphosphate from the Reactive Myosin-phosphate-ADP Complex. *A. Inoue, T. Arata, and Y. Tonomura* 661

Diphenyl Phosphorazidate: A New Potent Organic Azide Inhibiting Energy Transformation Reactions. *E. Kin and Y. Anraku* 667

No. 4, October, 1974

PAGE

Ionization Constants of Glu 35 and Asp 52 in Hen, Turkey, and Human Lysozymes. *S. Kuramitsu, K. Ikeda, K. Hamaguchi, H. Fujio, T. Amano, S. Miwa, and T. Nishina* 671

Interactions between Immunoglobulin Polypeptide Chains. *T. Azuma, K. Hamaguchi, and S. Migita* 685

Organ Specificity and Sensitivity to Alkaline Phosphatase of Factors Stimulating RNA Polymerase II. *S. Natori, K. Sekimizu, and D. Mizuno* 695

Studies on Rat Liver Catalase. VII. Double-labeling of Catalase by ^{14}C-Leucine and ^{3}H-δ-Aminolevulinic Acid. *T. Higashi, F. Kawamata, and T. Sakamoto* 703

Snake Venom Proteinase Inhibitors. I. Isolation and Properties of Two Inhibitors of Kallikrein, Trypsin, Plasmin, and α-Chymotrypsin from the Venom of *Russell's viper* (*Vipera russelli*). *H. Takahashi, S. Iwanaga, and T. Suzuki* 709

Snake Venom Proteinase Inhibitors. II. Chemical Structure of Inhibitor II Isolated from the Venom of *Russell's viper* (*Vipera russelli*). *H. Takahashi, S. Iwanaga, T. Kitagawa, Y. Hokama, and T. Suzuki* 721

Induction by Phenobarbital of Hepatic Microsomal Drug-metabolizing Enzyme System in Partially Hepatectomized Rats. *Y. Hino, Y. Imai, and R. Sata* 735

The Role of Tryptophan-62 in the Enzymic Reaction of Lysozyme. *T. Imoto, M. Fujimoto, and K. Yagishita* 745

Binding of Adenosine Di- and Triphosphates to Myosin during the Hydrolysis of Adenosine Triphosphate. *A. Inoue and Y. Tonomura* 755

Mode of Action on Proteins of Acid Carboxypeptidase from *Aspergillus saitoi*. *T. Arai and E. Ichishima* 765

Phosphoglycerate Kinase of *Bacillus stearothermophilus*. *K. Suzuki and K. Imahori* 771

Microdetermination of Individual Neutral and Amino Sugars and N-Acetylneuraminic Acid in Complex Saccharides. *S. Takasaki and A. Kobata* 783

Conversion of Glucose and Galactose to Lipids by Normal and Phytohemagglutinin-stimulated Lymphocytes. *Y. Inouye, S. Handa, and T. Osawa* 791

Interactions between Elongation Factor Tu·Guanosine Triphosphate and Ribosomes and the Role of Ribosome-bound Transfer RNA in Guanosine Triphosphatase Reaction. *M. Kawakita, K. Arai, and Y. Kaziro* 801

Bovine Plasma Kininogens. I. Further Purification of High Molecular Weight Kininogen and Its Physicochemical Properties. *M. Komiya, H. Kato, and T. Suzuki* 811

Bovine Plasma Kininogens. II. Microheterogeneities of High Molecular Weight Kininogens and Their Structural Relationships. *M. Komiya, H. Kato, and T. Suzuki* 823

Bovine Plasma Kininogens. III. Structural Comparison of High Molecular Weight and Low Molecular Weight Kininogens. *M. Komiya, H. Kato, and T. Suzuki* 833

Positional Specificity of *sn*-Glycerol 3-Phosphate Acylation during Phosphatidate Formation by Rat Liver Microsomes. *Y. Tamai and W.E.M. Lands* 847

Structural Studies on Anti-inflammatory Polysaccharides from *Streptomyces fradiae*. *H. Arita, H. Tsuzuki, K. Morihara, and J. Kawanami* 861

Changes of Thermostability and Activity of Thermolysin on Nitration with Tetranitromethane. *Y. Ohta, S. Tanabe, A. Hachimori, and T. Samejima* 871

SHORT COMMUNICATIONS

Difference in the Molecular Size of Hepatic Cytosol Glycogen Synthetase in Tadpole and Adult Frog, *Rana catesbeiana*. *Y. Goto, H. Nagano, and R. Shukuya* 879

PAGE

Affinity Chromatography of Neutral and Alkaline Proteases from *Bacillus subtilis* and of Thermolysin. *K. Fujiwara and D. Tsuru* 883

Affinity Chromatography of Lysozyme on a Sepharose Derivative Coupled with Lysozyme Lysate of Bacterial Cell Wall. *T. Yoshimoto and D. Tsuru* 887

PRELIMINARY NOTES

In Vitro Synthesis of Inosinetriphosphate in Human Erythrocytes. *B. Zachara* 891

Specific Inhibition of Acid Proteases from Brain, Kidney, Skeletal Muscle, and Insectivorous Plants by Diazoacetyl-DL-norleucine Methyl Ester and by Pepstatin. *K. Takahashi, W.-J. Chang, and J.-S. Ko* 897

A Simple Method for Extraction and Partial Purification of Chlorophyll from Plant Material, Using Dioxane. *K. Iriyama, N. Ogura, and A. Takamiya* 901

A Histone Deacetylase Capable of Deacetylating Chromatin-bound Histone. *H. Kaneta and D. Fujimoto* 905

No. 5, November, 1974

Inhibition by Analogues of the Hydrolysis of Phenyl α-Maltoside Catalyzed by Saccharifying α-Amylase from *Bacillus subtilis*. *T. Shibaoka, K. Ishikura, T. Inatani, H. Fukube, K. Hiromi, and T. Watanabe* 909

Purification and Some Properties of Cathepsin A of Large Molecular Size from Pig Kidney. *Y. Kawamura, T. Matoba, T. Hata, and E. Doi* 915

Structure and Function of 5S Ribosomal Ribonucleic Acid from *Torulopsis utilis*. I. Purification and Complete Digestion with Pancreatic Ribonuclease A and Ribonuclease T_1. *K. Nishikawa and S. Takemura* 925

Structure and Function of 5S Ribosomal Ribonucleic Acid from *Torulopsis utilis*. II. Partial Digestion with Ribonucleases and Derivation of the Complete Sequence. *K. Nishikawa and S. Takemura* 935

The Interaction of Elongation Factor 2 with Ribosomes from Silk Gland. Formation of an EF-2·Ribosome·GDP Complex. *H. Taira, S. Ejiri, and K. Shimura* 949

Succinate Dehydrogenase of *Escherichia coli* Membrane Vesicles. Activation and Properties of the Enzyme. *M. Kasahara and Y. Anraku* 959

Succinate- and NADH Oxidase Systems of *Escherichia coli* Membrane Vesicles. Mechanism of Selective Inhibition of the Systems by Zinc Ions. *M. Kasahara and Y. Anraku* 967

Transport of Sugars and Amino Acids in Bacteria. XI. Mechanism of Energy Coupling Reaction for the Concentrative Uptake of Proline by *Escherichia coli* Membrane Vesicles. *M. Kasahara and Y. Anraku* 977

Studies on Luciferase from *Photobacterium phosphoreum*. VII. Interaction with Carboxylic Acid. *K. Yoshida and T. Nakamura* 985

Electrophoretic Studies on Dyneins from *Tetrahymena* Cilia. *I. Mabuchi and T. Shimizu* 991

Effects of N-Ethylmaleimide on Dynein Adenosinetriphosphatase Activity and Its Recombining Ability with Outer Fibers. *T. Shimizu and I. Kimura* 1001

Some Properties of Chloramphenicol Acetyltransferase, with Particular Reference to the Mechanism of Inhibition by Basic Triphenylmethane Dyes. *H. Tanaka, K. Izaki, and H. Takahashi* 1009

Biological Significance and Localization of Antigenic Determinant Common to Thiol Proteases of Plant Origin. *T. Kato and M. Sasaki* 1021

PAGE

Studies on the Activation of Bovine Prothrombin. Isolation and Characterization of the Fragments Released from the Prothrombin by Activated Factor X.
T. Morita, H. Nishibe, S. Iwanaga, and T. Suzuki 1031

Local Conformational Change of Myosin Detected by Tryptic Digestibility. I. Monovalent and Divalent Ion-dependent Conformation of the Active Site of Myosin A ATPase.
T. Yamashita and T. Hasumi Mimura 1049

Studies on Hormone-sensitive Lipolytic Activity. *Y. Saito, N. Matsuoka, H. Okuda, and S. Fujii* 1061

Cytolipin R and Its Possible Precursor Ceramide Trisaccharide from Metastatic Rat Mammary Tumor. *H. Arita and J. Kawanami* 1067

Some Properties of Glutamine Synthetase from Baker's Yeast.
A. Hachimori, M. Itoh, and T. Samejima 1075

Studies on the Biosynthesis and Morphogenesis of R-type Pyocins of *Pseudomonas aeruginosa*. IV. Quantitative Estimation of the Rates of Synthesis of Pyocin R Subunit Proteins.
T. Shinomiya 1083

Phosphoenolpyruvate Carboxylating Enzyme in Dark-grown and in Green *Euglena* Cells. *M. Perl* 1095

Regulation of Prephenate Dehydratase in *Brevibacterium flavum*. *S. Sugimoto and I. Shiio* 1103

Lack of Exchange of Ribosomal Structural Proteins with Cell-Sap Proteins of Rat Liver *in Vitro*.
K. Terao, K. Tsurugi, and K. Ogata 1113

Control of Ketogenesis from Amino Acids. II. Ketone Bodies Formation from α-Ketoisocaproate, the Keto-analogue of Leucine, by Rat Liver Mitochondria. *C. Noda and A. Ichihara* 1123

Resolution of the Hog Heart α-Ketoglutarate Dehydrogenase Complex by Basic Polypeptide.
Y. Tomita, T. Yoshimura, and K. Imai 1131

SHORT COMMUNICATION

Induction of NADPH Enoyl-CoA Reductase in *Candida* Grown in the Presence of Unsaturated Fatty Acids. *K. Ishidate, M. Mizugaki, and M. Uchiyama* 1139

PRELIMINARY COMMUNICATIONS

Conversion of Transfer Ribonucleic Acid Precursors to 4S RNA by Enzymes from *Bombyx mori*.
K. Tsutsumi, R. Majima, and K. Shimura 1143

Preferential Production of IgG2 Anti-Hapten Antibody in Guinea Pigs Immunized with 2,4-Dinitrophenylated Lipopolysaccharides of *Escherichia coli*.
K. Furuichi, M. Kato, T. Nakamura, and J. Koyama 1147

Methanol Oxidation in a Reconstituted System of NADPH-cytochrome *c* Reductase, Catalase, and a Factor from Trypsin Digested Microsomes. *K. Takeshige and S. Minakami* 1151

No. 6, December, 1974

Purification of a β-Galactosidase from Hog Small Intestine and Its Action on Glycoproteins and Glycopeptides. *M. Sato and I. Yamashina* 1155

Transport of Sugars and Amino Acids in Bacteria. XII. Substrate Specificities of the Branched Chain Amino Acid-binding Proteins of *Escherichia coli*. *H. Amanuma and Y. Anraku* 1165

Membrane-bound Adenosinetriphosphatase of *Escherichia coli*. II. Physicochemical Properties of the Enzyme. *H. Kobayashi and Y. Anraku* 1175

Analysis of a Reversibly Polymerizing System by Frontal Gel Filtration. Aggregation of a Human Erythrocyte Membrane Glycoprotein. *M. Janado* 1183

PAGE

Amino Acid Sequence of an Alkaline Proteinase Inhibitor (*Streptomyces* Subtilisin Inhibitor) from *Streptomyces albogriseolus* S-3253.
T. Ikenaka, S. Odani, M. Sakai, Y. Nabeshima, S. Sato, and S. Murao 1191

Kinetic Properties of Dissociation of the H-Meromyosin-ADP Complex.
T. Arata, A. Inoue, and Y. Tonomura 1211

Ferredoxin from a Blue-green Alga, *Aphanothece sacrum* (Suringar) OKADA.
K. Wada, H. Kagamiyama, M. Shin, and H. Matsubara 1217

Studies on Rat Liver Catalase. VIII. Isolation and Translation of Catalase Messenger RNA.
T. Sakamoto and T. Higashi 1227

A Glucose-forming Amylase in Human Liver.
K. Tsujino, M. Yoshimura, K. Umeki, N. Minamiura, and T. Yamamoto 1235

β-Glucuronidase of Bovine Liver. Purification, Properties, Carbohydrate Composition.
M. Himeno, Y. Hashiguchi, and K. Kato 1243

Degradation of Guinea Pig IgG1 and IgG2 by Splenic Acid Protease. *T. Shinomiya and J. Koyama* 1253

Studies on the Regulatory Functions of Malic Enzymes. III. Regulatory Effects of L-Aspartate, Coenzyme A, and Divalent Metal Ions on NAD-linked Malic Enzyme from *Escherichia coli*.
M. Yamaguchi, M. Tokushige, K. Takeo, and H. Katsuki 1259

Studies on Polypeptide Elongation Factor 2 from Pig Liver. III. Interaction with Guanine Nucleotides in the Presence and Absence of Ribosomes. *K. Mizumoto, K. Iwasaki, and Y. Kaziro* 1269

Biosynthesis of a Mono-CoA Ester from Octadecane-1, 18-dioic Acid in Rat Liver.
H. Adachi, O. Mitsuhashi, and Y. Imai 1281

Purification and Properties of a Protein Activator of Human Pancreatic Lipase.
H. Kimura, M. Mukai, and T. Kitamura 1287

Characterization of Specific Antibodies to Phenobarbital. *H. Satoh and Y. Kuroiwa* 1293

Dilatometric Studies on the Conformational Changes of Hemoglobin. I. Volume Changes on the Formation of Azide-methemoglobin from Deoxyhemoglobin. *S. Yagisawa* 1303

Reoxidation of Reduced Ribonuclease from Bovine Seminal Vesicles. *M. Irie and A. Tsubota* 1319

Some Properties of Metal Ion-independent Adenosine Triphosphatase from Dog Kidney. *J. Suzuki* 1327

Local Conformational Change of Myosin Detected by Tryptic Digestibility. II. Effect of Magnesium Ions on the Fragmentation Pattern of Heavy Meromyosin by Trypsin.
T. Yamashita and T. Hasumi Mimura 1337

SHORT COMMUNICATION

Kinetic Study of Lysozyme Ethylene Glycol Chitin Interaction. *H. Nakatani and K. Hiromi* 1343

PRELIMINARY COMMUNICATIONS

A Novel Hemagglutinin Produced by *Aspergillus niger*. *Y. Fujita, K. Oishi, and K. Aida* 1347

Amino Acid Sequence of L-Asparaginase from *Escherichia coli*.
T. Maita, K. Morokuma, and G. Matsuda 1351

Inhibition of Carboxypeptidase Y by Chloromethyl Ketone Derivatives of Benzyloxycarbonyl-L-phenylalanine. *R. Hayashi, Y. Bai, and T. Hata* 1355

Tentative Amino Acid Sequence of Ribonuclease U_1. *J. Hashimoto and K. Takahashi* 1359

A Glutathione S-Aryltransferase of Monkey Liver. Purification and Subunit Structure.
H. Ito, K. Asaoka, I. Ichikizaki, and K. Takahashi 1363

Transient Kinetics of Glucoamylase-catalyzed Hydrolysis of Maltodextrin Studied by the Fluorescence Stopped-flow Method. *K. Hiromi, M. Ohnishi, and T. Yamashita* 1365

Primary Structure of the N-Terminal Portion of D-Amino Acid Oxidase.
K. Yagi, N. Sugiura, M. Mizuno, T. Hirayama, H. Kagamiyama, and T. Yamano 1369
